gaco.com

GacoFlex S20 Silicone Roof Coating System — the clean, economical and responsible solution for renewing weathered and leaking roofs.

Avoid time-consuming and costly tear-offs!

There's no need to tear off and replace your weathered and leaking roof. By re-covering, you save on labor costs and avoid landfill expenses, plus your existing roof can be re-covered without any interruption to your normal business operations.

Extend the life of your roof.

By renewing your roof, you'll never need to replace the roof again. Innovative silicone technology provides a seamless weather-tight seal that protects the substrate against ultraviolet light and severe weather, eliminates common sources of leaks and withstands permanent ponding water.

Renew and insulate.

GacoRoofFoam insulation combined with a GacoFlex S20 Silicone Roof Coating provides high R-value and forms a monolithic system that fully adheres to any shape or substrate while providing a seamless weather-tight seal. This is the first complete system to insulate, waterproof and withstand permanent ponding water.

Ideal for use on virtually any roof.

Apply over pre-existing elastomeric roof coatings, metal roofs, built-up roofing, mineral cap sheet, and weathered single ply membranes (EPDM, Hypalon® and TPO/CPA). Re-coat existing sprayed-in-place polyurethane foam, concrete, wood, and many other coatings.

Re-covering is the responsible choice.

By re-covering your roof, you avoid waste-generating tear-offs which impact landfills. And the highly-reflective, glossy finish of GacoFlex S20 Silicone Roof Coatings can help reduce energy costs.

Labor and material warranties available.

Decades of proven performance and protection. Guaranteed.

GacoFlex S20 Series has passed all the tests!
